

# DA Microfiber Correction System

Meguiars DA Microfiber Correction System is a two-step process designed to correct paint without leaving any swirls - guaranteed!  
Always clay the car before beginning the process below.

## SEVERE TO MODERATE

### STEP 1. Paint Correction

You Need: D300 DMX Disc

- Prime DMX Xtra Cut Disc with a uniform application of D300.
- Set DA Polisher to **4800 OPM**. Working in a 2'x2' section, apply 2-3 moderate pressure passes followed with 2-3 light pressure passes.
- Wipe off residue using a Meguiar's Ultimate Wipe Detailing Cloth.

*\*If DA Haze occurs follow process with D302 before Step 2*

### STEP 2. Paint Finishing & Wax Protection

You Need: D301 DMF Disc

- Prime DMF Finishing Disc with a uniform application of D301.
- Set DA Polisher to **3800 OPM**. Work surface, applying 2-3 light pressure passes.
- Wipe off residue using a Meguiar's Ultimate Wipe Detailing Cloth.
